SUBJECT INDEX—ALLERGY ABSTRACTS

A

Absorption of iodides, site of, *72*
ACTH allergy, prophylactic possibilities in, *88*
  effect of, on adrenals after prolonged steroid therapy, *23*
    on adrenal response after prolonged treatment with prednisone, *58*
  severe reaction following I.V. administration of, *36*
Adjuvants, role of, in antibody synthesis, *42*
Adrenal cortex, functional suppression of, by prednisone therapy, *59*
Adrenalin, activity of, in varying pH media, *71*
Adrenalin-fast asthmatic patients, effects of changes in pH on, *71*
Adrenals, activity of, in allergic asthma, *91*
  response of, to ACTH after prolonged prednisone therapy, *58*
Agranulocytosis, caused by reaction to imipramine (Tofranil), *31*
  chlordiazepoxide (Librium) as cause of, *48*
  prednisone as cause of, *47*
Air pollution, asthma caused by, in Japan, *51*
Allergic encephalomyelitis, experimental inhibition of, by 6-mercaptopurine, *45*
  reaction, protease activity in, *76*
  rhinitis, dexbrompheniramine in treatment of, *51*
Aminophylline, toxic reactions from, *31*
Amodiaquine, chronic urticaria treated with, *69*
Anaphylactic reaction, ACTH as cause of, *36*
Anaphylactogenic properties of antigen-antibody complexes, *36*
Anaphylactoid purpura, Henoch-Schönlein syndrome, *35*
  reaction, chymotrypsin as cause of, *37*
    ingestion of orange as cause of, *4*
  shock from Bromsulphalein, *22*
Anaphylaxis in mouse, produced with pollens, *41*
  passive, comparative efficacy of intravenous and intraperitoneal routes in, *77*
    cutaneous, and Dale tests, comparison of, *77*
Anemia, hemolytic, autoimmunity as cause of, in infectious mononucleosis, *91*
Angioedema, hemoconcentration in, *7*
  hereditary, acute abdominal symptoms in, *56*
Animal hypersensitivity in laboratory workers, *88*
Anti-antibody, human, some properties of, *73*
Antibody, circulatory, production of, by neonatal guinea pigs, *77*
  effect of x-rays on, *44*
  formation, adjuvant action of bacterial endotoxins on, *13*
    by iso- and heterotransplants, *41*
  production by transferred bone marrow, *28*
    effect of route of antigen injection on, *10*
    6-mercaptopurine as suppressive agent of, *45*
  relationship of circulating form of, to delayed reactions and Arthus reactions, *14*
  theoretical and practical concepts in formation of, *60*
Antigen, chemical stability of, for castor bean fraction CB-IC, *12*
  concentration and antibody synthesis, *42*
Antigen-antibody, biologic reactivity of, in specific precipitate, *15*
  complexes, anaphylactogenic properties of, *36*
    dissociation of, in vivo, *29*
Antinuclear antibodies, presence of, in systemic lupus erythematosus, *27*
Aralen, ineffectiveness of, in asthma, *67*
Arthritis, in rats, induced with mycobacterial adjuvant, *43*
Arthus reaction, effect of x-irradiation on development of, *14*
Ascaris sensitivity, experimental, leukocytic transfer of, in man, *59*
Asian influenza vaccination, dosage, routes, and schedules of inoculation, *93*
    reactions to, *93*
Asthma, adrenalin-fast, treatment by pH change in, *71*
  air pollution as cause of, in Japan, *51*
  alteration of serum enzyme patterns and liver damage in, *80*
  Aralen in treatment of, *67*
  chronic, use of prolonged steroid therapy, in, *3*
  compression of tracheo-bronchial lumen in, during expiration, *56*
  electroencephalogram abnormalities in, *2*
  esophageal obstruction simulating, *34*
  frequency of mold sensitization in children with, *2*
  gamma globulin in treatment of, *35*
  isoproterenol orally in treatment of, *83*
  mucoid impaction of bronchi in, *52*
  obstruction to expiration as means of increasing lung capacity in, *67*

January—February, pp. *1-16*; March—April, pp. *17-32*; May—June, pp. *33-48*; July—August, pp. *49-64*; September—October, pp. *65-80*; November—December, pp. *81-108*.

Asthma—Cont'd
phosphate insecticides as cause of, *84*
sympathicoamines in treatment of, *66*
treatment of, with glutamates, *34*
with inhalation of hydrocortisone, *18*
triamcinolone in treatment of, *67*
unexpected death in, *18*
Asthmatic patient, moribund, resuscitation of, *50*
Atelectasis, voluntary suppression of cough as cause of, *79*
Atopic dermatitis, chronic, skin histamine levels in, *36*
treatment of, with oral steroids, *20*
eczema, cod liver oil topically (unsaturated fatty acids) in treatment of, *52*
hypersensitivity, in vitro passive transfer of, *11*
Atropine, effect of, on pulmonary circulation in emphysema and bronchial asthma, *5*
Atopy, cystic fibrosis associated with, *15*
Autoantibodies, occurrence of, in chronic sialoadenitis, *76*
Autoimmune disease, ulcerative colitis caused by, *30*
unusual syndrome with breast hypertrophy and pigmentation of skin, *53*
mechanism, hemolytic anemia in infectious mononucleosis caused by, *91*
reaction, as cause of psoriasis, *43*

B

Bacterial sensitivity of leukocytes, comparison of, in normal and in atopic individuals, *14*
Basophil, role of, in cold hypersensitivity, *89*
Blood volume, alterations of, in angioedema, *7*
Boils and allergy, *89*
Bone marrow, antibody production after transfer of, *28*
Bovine serum, antigenicity of, and relationship to equine serum sensitivity, *70*
globulin in production of nephritis in hypersensitized rabbits, *39*
serum sickness following administration of, *70*
B. pertussis, effect of, on smooth muscle in mouse anaphylaxis, *78*
Bromsulphalein, anaphylactoid shock from, *22*
fatal reaction from, *22*
Bronchial sputum, serotonin content of, in asthmatics, *85*
Bronchitis, viral studies in, *78*

C

Candida albicans infection, enhancement of, by cortisone administration, *79*
Carbon dioxide narcosis from oxygen therapy, prevention of, by intermittent positive pressure breathing with oxygen, *24*
Castor bean allergen, stability of, to acid and heat, *12*
Cellular immunity in contact and delayed sensitivity, *73*
Cement dermatitis, chromium sensitivity in, *18*
Chest roentgenographic changes in lupus erythematosus, *7*
Chromatography, anion-exchange cellulose, separation of serum antibody activities by, *29*
Chromium sensitivity, role of, in cement and oil dermatitis, *18*
Chymotrypsin, anaphylactoid reaction to, *37*
Cinnamon, contact dermatitis caused by, *19*
Coccidioidin, immunologic properties of, *38*
leukocytic transfer of delayed hypersensitivity to, *38*
Cod liver oil (unsaturated fatty acid), topical, in treatment of atopic dermatitis, *52*
Coffee, raw, allergy to, *54*
Cold urticaria, role of mast cell and basophil in, *89*
Compound 48/80, cardiovascular and respiratory effects of lethal doses in rabbits, *8*
effect of, on toxicity of histamine and serotonin in mice, *9*
Contact and delayed sensitivity, study of specificity of cellular immunity in, *73*
dermatitis, bisphenol A, ingredient in epoxy resins, as cause, *68*
cinnamon as cause of, *19*
ragweed oil as a cause of, *68*
sawdust from *Grevillea Robusta* (Australian silk oak) as cause of, *68*
Contact-type sensitization, transfer of, by whole blood transfusion, *94*
Corticosteroids, value of, in allergic diseases, *46*
Cortisone, enhancement of fungus infections by, *79*
prolonged use of, in treatment of severe chronic asthma, *3*
Cow's milk, evaporated, presence of both lactalbumin and lactoglobulin in antigens common to goat's milk and, *26*
Cystic fibrosis, allergy of respiratory tract associated with, *37*
atopic conditions in association with, *15*

D

Delayed hypersensitivity and contact sensitivity, cellular immunity in, *73*
effect of route of antigen injection on, *10*
effect of x-irradiation on development of, *14*
failure of passive transfer in newborn infant, *26*
passive transfer of, to newborn rabbit, *64*
transfer of, to human skin material by leukocytes, *61*
Dermatitis due to griseofulvin, *52*
Dermatoses, treatment of, with intravenous steroids, *20*

Dexbrompheniramine maleate, use of, in treatment of allergic rhinitis, *51*
Dramamine, fixed drug eruption caused by, *53*
Drug allergy, vascular reactions in, *71*
toxicity, aminophylline as cause of, *31*

E

Eczema, atopic nasal cytology in, *15*
danger of vaccination reaction in patients with, *69*
milk allergy as cause of, *85*
vaccinatum, fatal, following contact with vaccination site, *69*
Electrolytes, variations in, peculiar to allergic individuals, *72*
Electrophoretic patterns in sera of patients with thyroiditis, *44*
Emphysema, course, prognosis, and treatment of, *6*
Emulsified extracts, studies in dispersion of, by means of incorporated radioisotopes in, *75*
Encephalitis, allergic, suppression of, by administration of supplementary antigen in early phase of immunization, *11*
Endotoxins, evidence against their presence in old tuberculin as cause of fever from, *13*
old tuberculin injections in animals, *13*
Eosinopenia, experimental, in vitro, *92*
Eosinophilic cystitis, *95*
granuloma of gastrointestinal tract, *79*
Eosinophils, effect of histamine on, *72*
Epilepsy, relationship of, to migraine and to asthma, *2*
Epinephrine, effect on experimental ectopic ventricular tachycardias, *57*
Epistaxis, occurrence of, in allergic children, *46*
Epoxy resins, contact sensitivity caused by, *68*
Erythema annulare centrifugum, occurrence of, in autoimmune disease, *53*
Exfoliative dermatitis, fatal, following injection of triple antigen and Salk vaccine, *19*

F

Fixed drug eruption, 8-chlorotheophylline in Dramamine as cause of, *53*
Food antigens, seed extracts as source of, *32*
Fungus infections, enhancement of, by cortisone, *79*

G

Gamma globulin, deposition of, in rheumatic heart tissue, *40*
presence of three in normal human serum revealed by monkey precipitins, *62*
serum levels of, in allergic children, *16*
treatment of infectious asthma in children with, *35*
Gastric secretions, analysis of, in pulmonary emphysema, *25*
Gastroduodenopathy, eosinophilic, *79*
Globulin, patterns of, in allergic individuals, *72*
Glomerulonephritis, anaphylactoid purpura associated with, *35*
Goat's milk, presence of common antigens with cow's milk, *26*
Goiter, soybean as cause of, *96*
formula as cause of, *47*
Grass pollinosis, repository form of therapy in, *82*
Grevillea robusta (Australian silk oak), sawdust from, as cause of contact dermatitis, *68*
Griseofulvin, dermatitis due to, *52*, *86*
Guillain-Barré syndrome after tetanus antitoxin injection, *39*
serologic findings in, *39*
Guinea pig, anti-insulin serum production in, *75*

H

Hay fever, specific therapy vs. antihistamines and topical steroids, *51*
topical steroids in treatment of, *51*
Henoch-Schönlein syndrome, anaphylactoid purpura, *35*
autopsy findings in 2 cases, *55*
Heparin, serotonin release suppressed by, in carcinoid tumor, *80*
Histamine, cardiovascular and respiratory effects of lethal doses in rabbits, *8*
content of skin in chronic atopic dermatitis, *36*
effect of, on circulating eosinophils in man, *72*
eosinophil-attracting effect of, in skin, *54*
Histoplasmin antigens, separation of, by ion-exchange chromatography, *57*
effect of, in vitro, on migration of leukocytes in infected guinea pigs, *29*
elicitation of humoral antibodies to, by single skin test, *63*
sensitivity, relationship to trichophytin and tuberculin sensitivity, *23*
Hydrocarbons, allergic reactions to, including phenol, mineral oil, fuel oil, gasoline, and stove gas, *86*
Hydrocortisone, inhalation of, in treatment of asthma, *18*
Hypersensitivity, delayed, and anamnestic response, *25*

I

Imipramine (Tofranil), as cause of agranulocytosis, *31*
Immediate hypersensitiveness in man, leukocytic transfer of, *59*
Influenza virus, immunization with, *94*
Insect bites, reactions to and treatment of, *87*
Insecticides, bronchial asthma caused by, *84*
Insulin antibodies, production of, in guinea pig, *75*

Intermittent positive pressure breathing in prevention of carbon dioxide narcosis from oxygen therapy, *24*
respiration, use of, in treatment of status asthmaticus, *2*
Iodides, site of absorption from gastrointestinal tract, *72*
Iso- and heterotransplants, antibody formation by, *41*
Isoproterenol, bronchial asthma treated with, in children, *83*
Isuprel, reversal of depressor action of, by sympathomimetic amines, *45*

L

Leukocytes, bacterial sensitivity of, in atopic and normal individuals, *14*
effect of histoplasmin on migration of, in infected guinea pigs, *29*
skin graft rejection factors, transferred by, *61*
Leukocytic transfer of delayed hypersensitivity to coccidioidin, *38*
of immediate hypersensitiveness in man, *59*
Librium, agranulocytosis caused by, *48*
Löffler's syndrome, association of, with nickel sensitivity, *95*
Lupus erythematosus, chest roentgenographic changes in, *7*

M

Mast cell, role of, in cold hypersensitivity, *89*
Meprobamate, allergy to, *88*
6-Mercaptopurine, effect on immunologic responsiveness, *45*
Migraine, electroencephalogram abnormalities in, *2*
Milk allergy, infantile eczema caused by, *85*
Mold sensitivity, frequency of, in children with bronchial asthma, *2*
Mouse anaphylaxis, effect of *B. pertussis* on smooth muscle in, *78*
Mucoid impaction in bronchi, *52*
Mucoviscidosis, atopic illnesses in association with, *15*
Mycobacterial adjuvant, connective tissue disease following injection of, *43*

N

Nasal allergy, occurrence of epistaxis in, *46*
cytology in infants with eczematoid dermatitis, *15*
Necrotizing arteritis in rat, experimental demonstration of gamma globulin in lesions of, *9*
Neonatal guinea pigs, antibody production by, *77*
Nephritis, production of, by bovine serum globulin in hypersensitized rabbits, *39*
Newborn infants, refractoriness to passive transfer of delayed hypersensitivity, *26*
Nickel sensitivity, association of, with Löffler's syndrome, *95*

O

Occupational allergic disease, raw coffee as cause of, *54*
Oil dermatitis, chromium sensitivity in, *18*

P

PAS hypersensitivity to, simulating infectious mononucleosis, *89*
hypersensitivity reactions to, *4*
incidence of hypersensitivity reactions following therapy with, *59*
Passive cutaneous anaphylaxis in demonstration of autoimmune mechanism in psoriasis, *43*
and Schultz-Dale techniques, comparison of, *77*
transfer, in vitro, of atopic hypersensitivity, *11*
of delayed hypersensitivity in newborn infant, *26*
Penicillin, combination of, with penicillinase, effect on blood penicillin levels, *71*
Penicillinase, combination of, with penicillin, for treatment of syphilis, *71*
role of, in treatment of penicillin reactions, *71*
Peripheral neuritis, streptomycin as cause of, *23*
Permeability increasing activity of human serum, *45*
Phenethicillin (Syncillin), allergy to, *21*
(Maxipen), incidence of reactions from oral administration of, *38*
Phenindione, idiosyncrasy to, *32*
Physicians, tuberculin sensitivity in, *63*
Pollen extracts, toxic and antigenic properties of, in mouse, *41*
Pollinosis, repository therapy in, *34*
Pork sensitivity as cause of reaction to ACTH, *36*
PPD, intermediate-strength, diagnostic significance of, in active tuberculosis, *12*
Prednisone, as cause of agranulocytosis, *47*
effects of, in chronic pulmonary emphysema, *50*
effects of, on tuberculin sensitivity, *21*
Progesterone, effect of, on respiration in emphysema and hypercapnia, *58*
Proteases, role of, in allergic reactions, *76*
Psoriasis, autoimmune mechanism as cause of, *43*
Pulmonary emphysema, analysis of gastric secretions in, *25*
effect of prednisone on, *50*
effect of progesterone on alveolar pCO_2 in, *58*
renal hemodynamic changes in, *92*
function, mean maximal expiratory volume velocity as measure of, *84*

R

Ragweed oil dermatitis, role of dermal sensitivity in, *68*
Relaxin, anaphylactoid reaction to, *22*
Renal hemodynamic changes in pulmonary emphysema, *92*
Repository immunization with influenza vaccine, failure to induce egg hypersensitivity by, *30*
therapy, analysis of results in 1,218 cases, *34*
treatment of grass pollinosis, *82*
of ragweed pollinosis, *82*
Reticulo-endothelial system, suppression of, by tranquilizing drugs, *8*
Rheumatic heart disease, gamma globulin deposition in lesions of, *40*
Route of injection, effect of, on circulating antibody and delayed sensitivity, *10*

S

Schultz-Dale reaction in mice, effect of *B. pertussis* on, *78*
Seitz filtration, effect of, on antigen of *Schistosoma mansoni*, *32*
Serotonin, suppression of release of, from carcinoid tumor by heparin, *80*
Serum enzymes, alterations in, in asthmatics, *80*
human, permeability increasing activity of, in guinea pig and human, *45*
protein, electrophoretic patterns of, in allergic children, *16*
abnormalities of, in chest disease, *83*
Sialoadenitis, autoantibodies to salivary glands present in, *76*
Skin tests, properties of coccidioidin in, *38*
reproducibility of, *5*
Smoking, acute effects of, on pulmonary function, *92*
Soy bean, anaphylactoid reaction from ingestion of, *70*
goiter caused by, *47*, *96*
Specific precipitate, biologic reactivity of antigen antibody in, *15*
Spermatozoa, human testicular and seminal, immunological differentiation of, *63*
Spleen, histologic responses of, in rabbit following single injection of purified protein antigen, *13*
Status asthmaticus, treatment of, with bronchial lavage and intermittent positive-pressure respiration, *2*
Steroid therapy, prolonged, effect of ACTH on adrenals after, *23*
Steroids, intravenous, dermatoses treated with, *20*
oral, in treatment of atopic eczema, *20*
topical, treatment of hay fever with, *51*
Streptomycin, peripheral neuritis due to, *23*
Sympathicoamines, effect of, on asthma, *66*
reversal of depressor effect from isuprel by, *45*
routes of administration, effect of, on asthma, *66*
Syncillin (phenethicillin), allergy to, *21*
Systemic lupus erythematosus, demonstration and titration of antinuclear antibodies in, *27*
Schönlein-Henoch syndrome, analysis of 22 cases, *48*

T

Tetanus antitoxin, accidental acquired hypersensitivity to, *3*
Thyroglobulin antibodies, incidence of, in patients without clinical thyroid disease, *62*
Thyroiditis, electrophoretic serum patterns in, *44*
diagnosis of, by detection of thyroglobulin antibodies, *62*
Trachea, compression of lumen during expiration in asthma and emphysema, *56*
Tranquilizing drugs, reticulo-endothelial system suppression caused by, *8*
Triamcinolone, treatment of asthma with, *67*
Trichinella, inability to demonstrate immunologic tolerance for, in neonatal mice, *75*
Trichophytin sensitivity, studies on, *42*
Tuberculin, mechanism of fever induced by, in tuberculin-vaccinated guinea pigs, *13*
sensitivity, effect of prednisone therapy on, *21*
in physicians, *63*
test and diagnosis of clinical tuberculosis, *12*
testing, comparison of two commercial PPD's, *74*
Tuberculosis, significance of tuberculin test in, *12*

U

Ulcerative colitis, autoimmune disease, *30*
Urinary bladder, eosinophilic infiltration of, *95*
Urticaria, chronic, amodiaquine in treatment of, *69*
cyproheptadine (Periactin) in treatment of, *85*
incidence following biosynthetic penicillin therapy, *38*

V

Viral studies in chronic bronchitis, *78*

3995
